Product Options for Pocket Form Isolator™

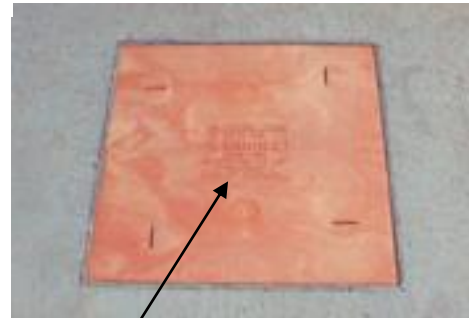

**Cast in Place
Concrete Forms
For Columns**

**Avoid Construction Debris
Filling up the Column Pit**

PFI® Safety Lid

OSHA Approval and Load Rating
Stamped on every Lid

OSHA Approved Safety Lids for 24" and 28" Square pockets

POCKET FORM ISOLATOR™ Safety Lids are approved by OSHA for 150 LBS/FT² foot traffic on jobsites. These Safety Lids keep workers safe by covering the hole left by pouring the column isolation pocket prior to setting the steel column in place.

Green Considerations

Pocket Form Isolator™ utilizes recycled plastic (HDPE regrind) in a post-industrial format as well as in a post-consumer format. POCKET FORM ISOLATOR™ Safety Lids are also re-usable which cuts down on waste materials used for temporary covers.

Pocket Form Isolator™

Options

VOIDCAP

Now VoidCap can be used with PFI®

A polystyrene expansion cap with a removable top, VoidCap can be placed over all types of expansion joint. After the concrete is poured the top of the VoidCap is level with the surface of the slab. After the surface of the concrete is finished, the top portion of the VoidCap can be removed leaving a void 1/2" deep. Any type of self-leveling caulk can be placed into the void sealing the joint from surface moisture.

NEW PVC VoidCap also available... Constructed of Heavy-duty PVC with UV inhibitors that shield the VoidCap from the damaging ultra-violet (UV) rays from the sun.
